**-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --**

**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## DETAILED ACTION

### *Specification*

1. The disclosure is objected to because of the following informalities: On page 6, at line 16, should the term "polyesters" be corrected to --polyethers--? Applicant should also review the spec. for other similar errors.

Appropriate correction is required.

### *Claim Rejections - 35 USC § 103*

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 1-6 are rejected under 35 U.S.C. 103(a) as being unpatentable over Korea'442 alone or in view of Xu et al. and Snyder, Jr. et al.

Korea'442 as discussed in the background of the present application discloses substantially the claimed fluorinated polyethers of the instant invention for use in the making of optical waveguides. Korea'442 fluorinated polyethers compound seem lacking of a fluorinated aliphatic group at a main chain to obtained the desired optical characteristics. However, it is well known to provide a fluorinated aliphatic group to a fluorinated polyethers (see Xu et al. and Snyder et al.) Alternatively, it would have been obvious to add a fluorinated aliphatic group to the fluorinated polyethers through routine experimentation, optimum ranges and use of preferred materials (In re Aller, 105 USPQ 233 (CCPA)).

Therefore, it would have been obvious at the time of the invention to construct or provide Korea'422 with the claimed fluorinated polyethers having a fluorinated aliphatic group as that of the instant invention for obtaining the desired optical characteristics required in certain optical devices.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Khiem Nguyen whose telephone number is 571 272-2096. The examiner can normally be reached on Mon-Fri.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Lynn Feild can be reached on 571 272-2800 ext 39. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
